BetterBetting

MyBetrWallet.io – Instructions For Customers
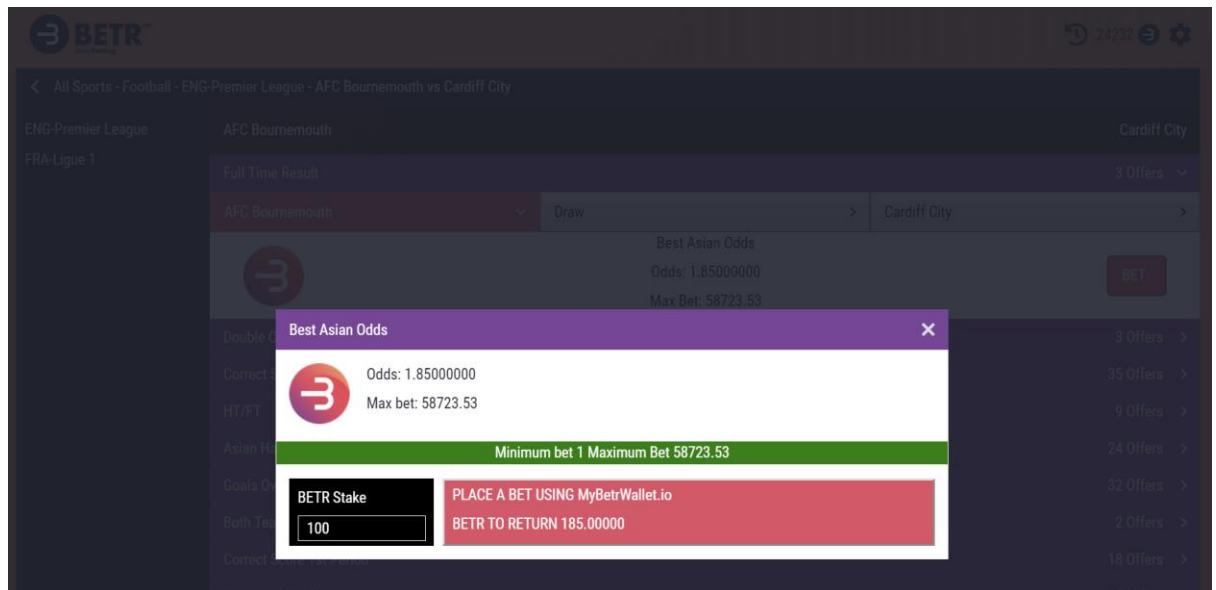

How to use client side BETR wallet https://mybetrwallet.io

This description applies to production environment:

1) Open BETR web app: https://bet.betrodds.io/

2) Set MyBetrWallet.io wallet as your wallet for placing BETR bets. You can do it under "Account Settings"
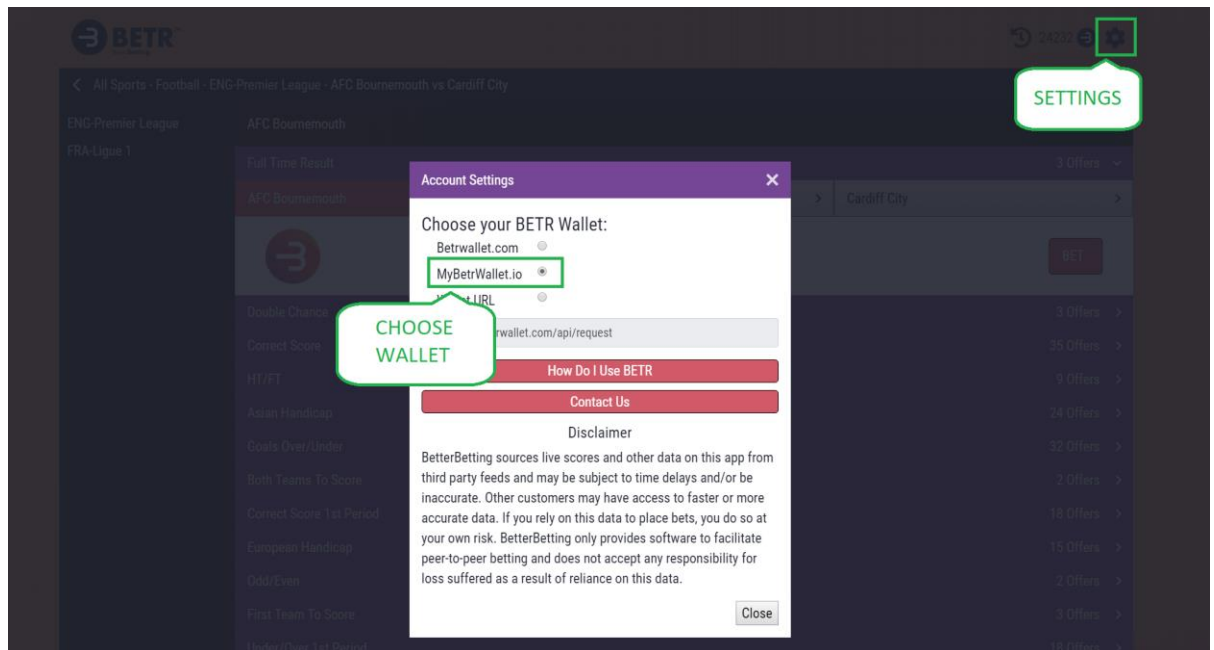

3) Find your event, market and lay. Choose your bet amount and place a bet on
https://bet.betrodds.io/

4) BETR web app composes the transaction to place a BETR bet to Ethereum blockchain. You are redirected to MyBetrWallet.io wallet where you need to login to your wallet and authorize that betting transaction. For that you need to follow the steps:

5) Login to your wallet on MyBetrWallet.io
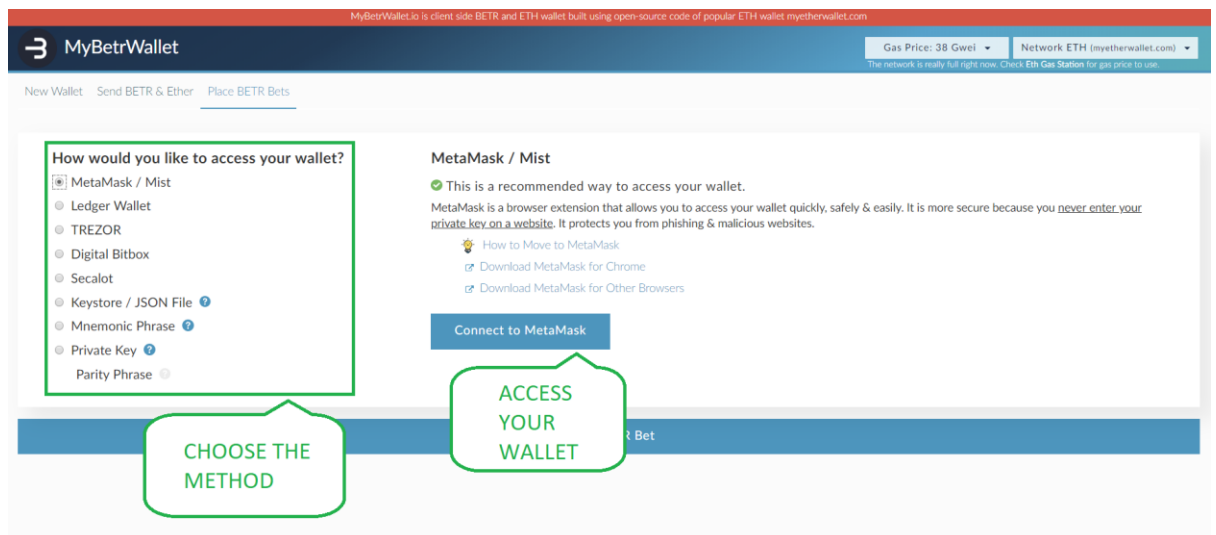

6) Place BETR bet
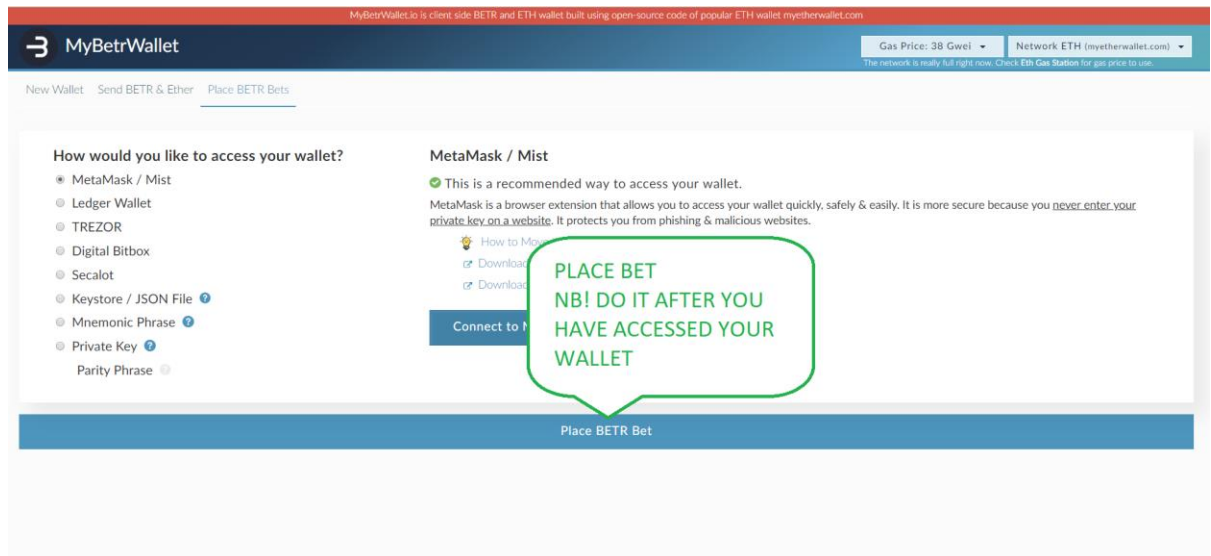

7) Set Gas limit: default limit 300000 should work in most occasions
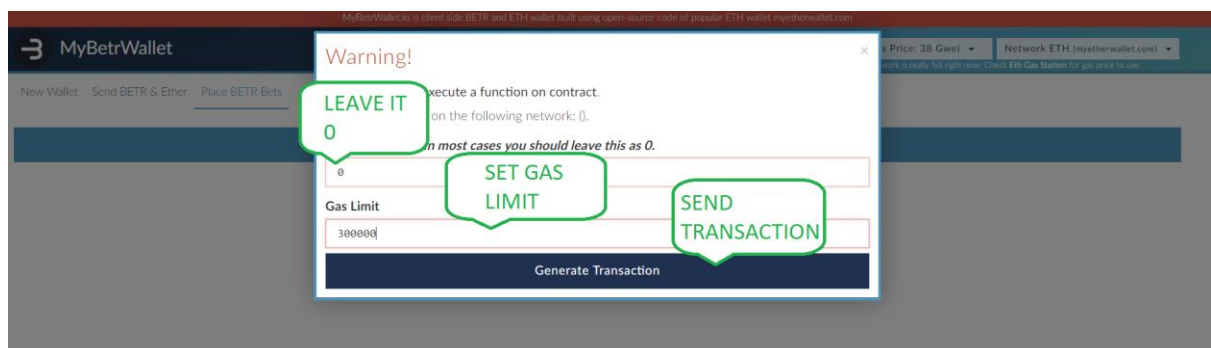

8) Confirm that you want to send the betting transaction to Ethereum blockchain

9) Authorize the transaction with your wallet (Metamask example)

10) Betting transaction is now sent to Ethereum blockchain and you can see it when you explore your Ethereum address transaction history (Metamask example)
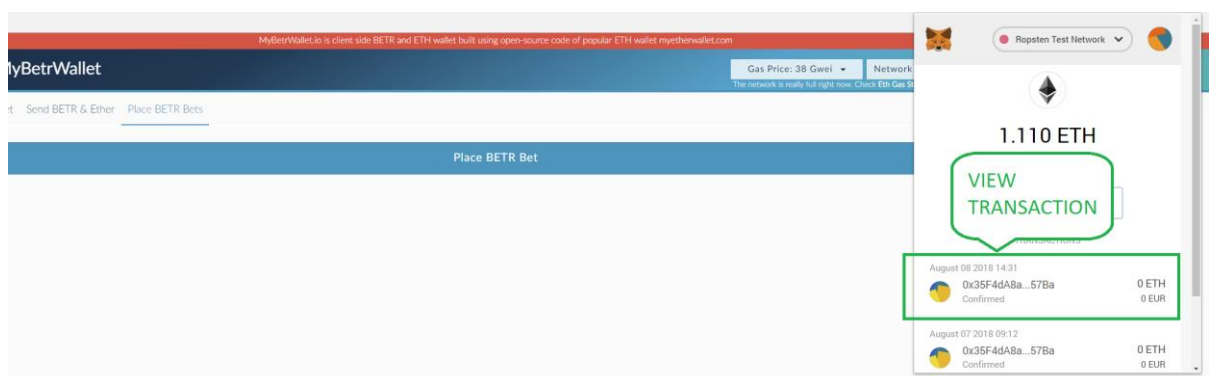

11) Your winnings will be automatically payed to the same wallet address what you used for betting. It will be done automatically when the bet is resulted.
